

AIME platform V 0.6

Navigation

All of the items on the platform are arranged into three columns:

- the column **T** (for text) containing the text of the book;
- the column **V** (for vocabulary) containing definitions of the key concepts in AIME;
- the column **D** (for document) containing AIME documents allowing readers to follow the experiential dimension of the different [#modesofexistence](#);
- the column **C** (for contribution)...

By clicking on any of the items you get a preview.

In the **D** column, icons indicate any media that is included (e.g., PDFs, quotations, videos, etc.)

By clicking on 'read more' you put the item into leading status: this means that all the content in the other columns are rearranged accordingly. If it is a:

- **T**, you will see all of the concepts mentioned in the text (words in bold small capitals) in the **V** column and all the linked documents (underlined in green) in the **D** column;
- **V**, you will see all of the text chunks where the items appear in the **T** column and all of the linked documents (underlined in green) in the **D** column ;
- **D and C**, you will see the anchor that is linked to it.

When an item in the **V** column is leading, all the other items mentioned in its definition will be displayed underneath.

You can explore these and all previously explored items will be stacked on top.

The search function

Each time you search for an expression, the results will be displayed in 3 columns.

By using the quotation marks, you can search for the exact expression.

All matches are highlighted in red.

By searching for an author, e.g., 'James' or 'Whitehead', you will get a kind of bibliography.

The bookmark function

You can save any kind of item present on the platform: text excerpts, pictures, video or bibliographical references.

You can bookmark excerpts by selecting the text and then clicking on the star that appears.

You can bookmark multimedia items by clicking once on the grey area and then clicking on the star that appears.

To access your bookmarked items, click on the suitcase icon on the top bar.

To delete a bookmark, click on it and then click on the cross icon.

The contribution function

The "C" Column works :) Now, you can suggest new content to improve the Inquiry simply by selecting the text and clicking on the blue bubble that appears.

MCGEE INSTAURATION (NORMATIVITY OF NETWORKS 4.1)

- 1- I will suggest that Dworkin's interpretive specification (law as integrity) rightly valorizes the beings of instauration, which Latour calls "carriers of legal integrity" (translated somewhat unexpectedly into English as "safety-bearers"), while nevertheless leading us up the garden path in consolidating all those beings into one political-moral virtue and making legal truth turn upon that consolidated entity; that Weinrib's conceptual specification (law as immanent rationality) rightly captures the pathway of legal grounds without which law could not subsist, while going far astray in every other respect; and that Luhmann's functional specification (law as protected expectations) rightly observes the sort of alteration or differing peculiar to the beings of law and so to law as a mode of existence, but that no function, let alone the one Luhmann identifies, is capable of specifying legality.

- 5- [THIS IS JUST AN EXAMPLE]

- 6-

You can have an overview of all your contributions and you browse through them by clicking on the notebook icon.

You can submit your contribution to the AIME Mediation Team by clicking "Publish contribution" (this feature will be available soon). After a review and validation process, it will be published on the website.
